MUHAMMAD SIDDIQUI

First-Year Doctor of Medicine (MD) Student

Ajman, UAE • 050 392 1477 • muhammadfurq.s23@gmail.com

PROFILE

I am a first-year Doctor of Medicine student at Gulf Medical University, motivated by the opportunity to understand how science can make a meaningful difference to people's health and lives. My interest in medicine has developed through experiences that allowed me to explore anatomy and laboratory science, as well as observe healthcare professionals in a hospital setting. Practical work has encouraged me to be curious about the science behind investigations, while clinical observation has shown me the importance of listening, teamwork, and thoughtful decision-making in patient care. I enjoy learning by asking questions, taking part in hands-on activities, and working with others towards a shared goal. As I progress through medical school, I hope to build a strong scientific foundation, remain open to new areas of learning, and explore how I can contribute to research and healthcare. I am particularly interested in neurology, anatomy, and evidence-based medicine.

EDUCATION

Doctor of Medicine (MD) — Year 1

Gulf Medical University, Ajman, UAE | August 2026 – Present

Studying foundational medical sciences, including anatomy, physiology, and biochemistry, alongside practical learning that supports the development of scientific understanding and core medical knowledge.

CLINICAL OBSERVERSHIP

Clinical Observership

Fakeeh University Hospital (FUH) | 27–31 October 2025

- Completed a five-day observational rotation across Ophthalmology, Neurology, the Emergency Department, Cardiology, and Paediatrics.
- Shadowed doctors during clinical activities and observed patient interactions and consultations.
- Engaged with doctors, asked questions, and developed an introductory understanding of how different specialties assess patients and approach clinical decisions.
- Gained exposure to the roles of different healthcare professionals and the importance of communication and collaboration within clinical teams.

MUHAMMAD SIDDIQUI

Curriculum Vitae | Practical & Community Experience

MEDICAL SCIENCE PRACTICAL EXPERIENCE

Supervised Year 1 Practical Sessions

Gulf Medical University | 2026

- Carried out urine sample analysis and interpreted practical findings as part of university-based learning.
- Performed blood grouping exercises, including ABO and Rh typing, using peer samples.
- Carried out bleeding time and clotting time assessments during practical sessions.

These were hands-on student practical activities. A laboratory technician was available to provide supervision and guidance when needed.

RESEARCH & PRACTICAL TRAINING

Future Scientists of the UAE Programme

Gulf Medical University | 18 November 2023 – August 2024

- Participated in anatomy laboratory learning, including cadaveric study and dissection activities.
- Took part in molecular biology experiments involving RNA-to-DNA reverse transcription and DNA-to-RNA transcription, with an oncology focus.
- Practised dental skills through wax tooth carving and identification of dental anatomy.
- Worked collaboratively in guided laboratory and research-based activities, developing practical, analytical, and observational skills.

VOLUNTEERING & COMMUNITY INVOLVEMENT

Volunteer — SCR Department

Al Noor Training Centre for Persons with Disabilities | 15 October 2023 – 14 December 2024

- Supported administrative operations within the SCR Department, including organising files and maintaining records.
- Assisted staff with documentation and coordination tasks to support the department’s day-to-day activities.
- Contributed to planning and organising events and festivals, and supported activities involving centre participants.
- Developed communication, teamwork, and professionalism through working with staff and participants.
